### Control to Power

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Charge Up Quickly

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Fast Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Wireless Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Fast Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Wireless Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Fast Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Wireless Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Fast Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Wireless Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please check the following:

- Make sure the phone is properly aligned with the charging area.
- Make sure the phone is not covered by any case or screen protector.
- Make sure the phone is not too hot or too cold.
- Make sure the phone is not too old or too new.
- Make sure the phone is not too damaged or too new.

### Fast Charge

1. Connect the power cable to the power supply. The indicator will flash blue and the phone will start charging.

2. Place your iPhone or Samsung Galaxy phone on the charging area. The indicator will stop flashing and the phone will start charging.

3. If your phone is not charging, please
