8. On/Test/Off Switch: On: Automatic monitoring mode, camera enters automatic monitoring state. Test: Check, Test at it, Set camera parameters, Preview, Playback. Off: Power off.

INSTALLATION GUIDE

Download the Flysocks app

Follow the instructions in the Flysocks app to connect the camera via WiFi. You can then use the app to operate the camera, adjust settings, preview, and download files.

Memory Card Installation

Release the latch, open the front cover and insert the memory card (with the metal contacts facing down). Push the card as shown below until you hear a click. Once the memory card is correctly inserted, the memory card icon will be displayed on the screen.

Note

1. Ensure the memory card is inserted and formatted by the camera.
2. Do not insert or remove the memory card while the camera is powered on, as it may damage the memory card or result in data loss.
3. Use a U3 or higher class memory card; using a low-quality card may cause the camera to work abnormally.

Battery Installation

Note

1. Do not mix old and new batteries.
2. Ensure correct battery insertion to avoid damaging the camera.
3. After inserting the batteries, securely fasten the toggle hasp.
4. If the camera will not be used for an extended period, remove all batteries.

Connect to PC

Note

First, connect the USB cable to the camera, and then to the computer. Ensure that the cable is firmly connected.

Mount and fix the camera
