ONE WORLD

A black, rectangular electronic component, possibly a battery or a sensor module, is shown from a top-down perspective. It has a central rectangular area with a white label. The label contains the text "LABEL LOCATION". The component has four circular indentations, one in each corner of the central area. There are also two small gold-colored pins or contacts on the left and right sides of the component. The component is resting on a light gray surface.

**LABEL
LOCATION**
