Scan QR code to download the app"Smart Life" or from

App Store Google Play

2. TECKIN Bande Lumineuse Intelligente prend en charge uniquement le réseau Wi-Fi à 2,4 GHz.

3. Suivez les instructions de l'application et connectez l'appareil à votre réseau.

Remarque: la configuration des deux modes (Mode Rapide / Mode AP) sont tous disponibles pour vous permettre d'ajouter les appareils. Mais le mode rapide est recommandé.

Configuration rapide

1. Avant de vous connecter, assurez-vous que votre smartphone ou votre appareil est bien connecté à votre réseau WIFI

2. Mettre la prise sur "in-out-in-out-in", la bande lumineuse doit clignoter. (Merci d'attendre 6 à 8 secondes après que la bande lumineuse soit allumée. La lumière se mettra ensuite à clignoter).

3. Appuyez sur l'icône «+» de l'application Smart Life pour ajouter un appareil.

4. Suivre les instructions de l'application pour connecter la bande lumineuse connectée à votre réseau Wi-Fi.

Configuration du mode Point d'accès

1. Assurez-vous que votre smartphone ou que votre appareil soit bien connecté à votre réseau Wi-Fi avant d'essayer de brancher la bande lumineuse.

2. Mettre la prise sur "in-out-in-out-in", assurez-vous que la bande lumineuse clignote rapidement puis attendre que la bande clignote lentement (toutes les 1,5 secondes).

3. Appuyez sur l'icône «+» de l'application Smart Life pour ajouter un appareil.

4. Appuyer sur "AP Mode" se situant dans le coin droit de l'application Smart Life.

5. Suivre les instructions indiquées par l'application pour connecter la bande lumineuse au réseau Wi-Fi.

Pasos

1. Escanear el código QR o ir a la Tienda de Aplicaciones para descargar la Aplicación Smart Life. Crea una cuenta y agrega tu dispositivo.

Scan QR code to download the app"Smart Life" or from

App Store Google Play

2. TECKIN Tira de Bombilla Inteligente sólo es compatible con la red Wi-Fi de 2.4GHz.

3. Seguir las instrucciones de la Aplicación y conectar el dispositivo a su red.

Atención: Hay dos modos de configuración (Modo rápido / Modo AP) disponibles para que pueda agregar los dispositivos. Se recomienda el Modo Rápido.

Configuración de Modo Rápido

1. Antes de conectarse, asegurar de que su móvil o dispositivo esté conectado con el Wi-Fi de su hogar con éxito (2.4 GHz).

2. Poner el enchufe de alimentación "adentro-afuera-adentro-afuera-adentro", y la Tira de Bombilla Inteligente parpadea rápidamente (espere de 6 a 8 segundos cuando la Tira de Bombilla Inteligente esté encendida, y luego la Tira de Bombilla Inteligente parpadeará).

3. Toque el icono "+" de la aplicación Smart Life para agregar el dispositivo.

4. Seguir las instrucciones en la Aplicación para conectar la Tira de Bombilla Inteligente a su red Wi-Fi (2.4 GHz)

Configuración del Modo AP

1. Antes de conectarse, asegurar de que su móvil o dispositivo esté conectado con el Wi-Fi de su hogar con éxito (2.4 GHz).

2. Poner el enchufe de alimentación "adentro-afuera-adentro-afuera-adentro", asegúrese de que la Tira de Bombilla Inteligente parpadee rápidamente. Y luego coloque el enchufe de alimentación "adentro-afuera-adentro-afuera-adentro", la tira de bombilla inteligente parpadeará lentamente (parpadeará cada 1.5 segundos)

3. Toque el icono "+" de la aplicación Smart Life para agregar el dispositivo.

4. Hacer clic en el Modo AP en la esquina derecha de la Aplicación Smart life.

5. Seguir las instrucciones en la Aplicación para conectar la Tira de Bombilla Inteligente a su red Wi-Fi (2.4 GHz)

Settaggi

1. Scannerizza il QR code ed entra nell'App store per scaricare l'App Smart Life. Crea un account e aggiungi il tuo dispositivo.

Scan QR code to download the app"Smart Life" or from

App Store Google Play

2. TECKIN striscia LED smart supporta solo le reti Wi-Fi 2.4 GHz

3. Segui le istruzioni contenute nell'app e connetti il tuo dispositivo alla rete.

Nota: Ci sono due tipologie di configurazione (Quick Mode/ AP Mode) disponibili per collegare i tuoi dispositivi. La Quick mode è quella raccomandata

Configurazione Quick Mode

1. Prima di iniziare il collegamento, assicurarsi che lo smartphone o il dispositivo siano connessi alla rete Wi-Fi di casa (2.4 GHz)

2. Impostare il dispositivo nel modo seguente "acceso-spento-acceso-spento", assicurarsi che la striscia LED smart lampeggi velocemente (per favore attendi 6-8 secondi dall'ultima accensione della striscia LED, e successivamente la stessa si accenderà)

3. Clicca sull'icona "+" dell'app Smart Life per aggiungere il dispositivo.

4. Segui le istruzioni all'interno dell'App per connettere la smart light strip al tuo Wi-Fi di casa (2.4 GHz)

Configurazione AP Mode

1. Prima di iniziare il collegamento, assicurarsi che lo smartphone o il dispositivo siano connessi alla rete Wi-Fi di casa (2.4 GHz).

2. Impostare il dispositivo nel modo seguente "acceso-spento-acceso-spento", assicurarsi che la striscia LED smart lampeggi velocemente. Successivamente impostare il dispositivo nuovamente in "acceso-spento-acceso-spento", la striscia LED smart lampeggerà lentamente (un flash ogni 1.5 secondi)

3. Clicca sull'icona "+" dell'app Smart Life per aggiungere il dispositivo.

4. Clicca AP mode nell'angolo destro dell'APP Smart life

5. Segui le istruzioni all'interno dell'App per connettere la smart light strip al tuo Wi-Fi di casa (2.4 GHz)

FCC Statament

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference.
(2) this device must accept any interference received, including interference that may cause undesired operation.

"Please note that changes or modifications of this product is not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment."

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help

Warm Tips

- Please check whether device is connected with power and your phone is connected with Wi-Fi.
- Check routers: If router is dual-band router, please select 2.4GHz network and add device. You also need to open the router broadcasting function.
- Set up wireless router: Set encryption method as WPA2-PSK authorization type as AES, or set both as auto. Wireless mode cannot be only.
- Please name router Wi-Fi in English. In order to stay strong Wi-Fi signal, please keep device and router within certain distance.
- Check whether connected devices have reached the Maximum number router connection. If so, please try to turn off the Wi-Fi connection of some devices.
- Make sure router wireless MAC filtering function is enabled. Remove the device from the filter list and make sure that router is no prohibiting device from connection.
- Make sure the entered password is correct when adding new device.

Warranty

The product carries a one-year warranty from purchase date. Please feel free to contact us when you have any product problem. Teckin customer service email:
