Despite its compact design the Alpha packs a powerful 18W in-/output that's delivered through USB-C PD (Power Delivery). This means you're able to fast charge almost any smartphone – Android devices, as well as Apple iPhones (by using a USB-C to Lightning cable).

The Power Bank Alpha features Quick Charge 3.0 technology, allowing extra fast charging of mobile devices. If your smartphone uses the same technology, it will charge up to 85% faster!

*Please note: Not all devices have this technology, check the documentation of your device carefully to see whether it is QC 3.0 compatible.

Qi is the universal standard used for wireless charging. Its name is borrowed from the traditional Chinese language, meaning "life force" or "natural energy".

The Alpha is designed and engineered with a great attention to detail, and incorporates high quality materials like aluminium and tempered glass.

All Xtorm products have a 2 year warranty in case something goes wrong. We ensure that you will receive a replacement if the product fails within 2 years.

3/6 CHARGE YOUR MOBILE DEVICE

Your smartphone will indicate charging status.

Simply press the button and place your smartphone on the surface of the power bank to start charging.

You don't even have to remove your protective case, all products are engineered in such a way that they easily charge through covers.*

* A metal case has a negative effect on the charging process because Qi wireless charging works by using a system of magnetic induction coils.
