Instructions

1. Pairing

a. Turn on remote control by switching the ON/OFF button to ON, the indicator light flashes blue after entering into pairing mode.

b. Enter settings on your device, activate the wireless function, find the remote device named "AB Shutter3" in the device list, click the name to connect, the blue light goes out after connected.

c. The remote control will automatically connect to your device next time.

2. Replace Battery

Turn on the remote control, the indicator light won't light up when the battery runs out. Please remove the battery cover and replace the old battery with a new one, then install the battery cover again.

Note: Please replace with a CR2032 3 Volt coin-cell battery.

3. Take Photos

a. Open your preferred camera application on your device.

b. Select photo mode, aim the camera.

c. Press shutter button on the remote to take photo, (iOS button is for iPhones and Android button is for Android phones).

4. Record Videos

a. Open your preferred camera application on your device.

b. Select video mode, aim the camera.

c. Press the shutter button on the remote once to start record, press again to stop record. (iOS button is for iPhones and Android button is for Android phones).

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
