Pairing Instructions

Pairing with tablets and cell phones

- Turn on the laptop's power button. The green status light will activate for 5 seconds and then shut off.
- Press the **F12** key to begin pairing. The Bluetooth indicator light will blink blue.
- Go to your "SETTINGS" screen on your tablet with Bluetooth enabled, and add the laptop to Bluetooth list and search for the keyboard device.
- Select "Typepad Keyboard" should appear.
- Select "Typepad Keyboard" on your device, type the code on the keyboard and press the **Enter** key to begin pairing your device.

Pairing with a computer

- Please make sure your computer has Bluetooth capability.
- Turn on the laptop's power switch. The status indicator will light up for seconds and then turn off.
- Press the **F12** key to begin pairing. The status indicator will start flashing. This keyboard is now ready to connect to your computer.
- Go to the Bluetooth setup menu on your PC (or Bluetooth Preference on a Mac) and start searching for the keyboard devices. Add the laptop to your Bluetooth device list or Mac OS.
- Select "Typepad Keyboard" on your PC. Type the code on the keyboard and press **Enter** key. Keyboard will be paired to your PC.

Special Note:

The Typepad Keyboard support the Win+Mnibus.

Special Note:

- For Android 4 users: The Caps Lock indicator may not light, but will still function normally.
- Apple iOS: Only support Bluetooth mouse function.
- Bluetooth Connectivity: The keyboard will be paired to the Bluetooth device after connected successfully. Otherwise the keyboard's function key will be invalid.
- When connecting the keyboard with a PC, please note that a Bluetooth mouse is required (Bluetooth Keyboard). Connecting the device with a tablet, smartphone or any Bluetooth device does not require a separate receiver.

Special Note:

- Only one device can be actively paired at one time.
- For the Bluetooth-enabled device, please only use the Bluetooth Standard Connectivity before switching to connecting.
- After pairing for the first time, the device will connect to the keyboard automatically when opening the keyboard.
- In case of connect failure, delete the pairing record on the keyboard, and try the above steps again.
- For using 5 Tablets, like "Typepad keyboard" when Bluetooth is found, please use the pairing of the first tablet, pairing the second tablet, and so on. The pairing of the third tablet will be successful only when the pairing of the second tablet is successful. The pairing of the fourth and fifth tablet will be successful only when the pairing of the third tablet is successful.
