7. Switching machine precautions

This product is a MagSafe-style charging earphones, and the shape of charging box is round and sleek. It is convenient to directly pick up the earphones from the charging box for which many people always have a charging line, causing the charging column connects thimble accidentally or repeatedly many times. The earphones will turn on once picked up, that need to depend on the disconnected charge voltage signal to recognize.

If the earphones is not directly picked up, but still shake connecting box to cause the charging column connects thimble accidentally, the earphones will turn on the state of recognizing charging (shaking) and the recognition time is about 1-2 seconds. When the user not pick up the earphones accidentally turn off and recharge 3-5 seconds, the earphones has not yet completed the process of recognizing the charging that will lead to turn on successfully and let the user think that it is a faulty machine.

8. Pairing

1. Correct wear, is the left ear, is the right ear.
2. When the two left and right earphones are used separately, when the left and right earphones are used separately, they can be used as complete and independent Bluetooth speakers. At this point, each earphone needs to be paired separately from the paired phone.
3. The left and right earphones is used at the same time the left and right earphones will be automatically turned on when they are taken out from the charging box and they will flash blue light with each other.
4. After booting the left and right earphones will automatically pair within 5 seconds, and right earphone (R) will automatically pair (left) (L) will flash with, while the left earphone (L) will flash once for 5 seconds. Bluetooth devices can search for the Bluetooth earphone named Sanag J1, the connection is successful to receive mobile audio.

Change the pairing, shutdown and charge. When the pairing with headset is turned on, it will automatically connect the left and right earphone.
If you need pairing with other mobile phone, please turn off the Bluetooth of the original mobile phone and search for the device name Sanag J1 by turning on the Bluetooth of mobile phone with the Bluetooth headset turned on.
3. When the mobile is paired, the headset is in standby (bluetooth and the power consumption) very low.
4. When you use the headset, put the headset into the storage box, the headset will automatically turn off and recharge 3-5 seconds. If you have a storage box, disconnect the bluetooth manually, about 5 minutes after the headset will automatically turn off.

9. Indicator light

Smart charging cabin: Put the headset in it and start charging automatically.
After fully charging, charging stops automatically.

Indicator:
● Charging (breathing lamp status)
● Has stopped charging (light goes out)

When connecting Bluetooth to play music, the whole circle of light is in the breathing light effect. Press and hold the touch area for 3 seconds to turn off the light. If you need to switch back to the breathing light state when the light is off, turn off the headset and restart it.

Warning

Because earbuds are small, keep them out of reach of children when charging or placing them. To prevent children from eating.
