Safety And Care Tips

- Always unplug the lamp before cleaning. Do not use if the cord is damaged.
- Ensure the lamp is placed on a stable surface. Follow the installation instructions carefully to avoid damage.
- Use the touch control or remote to adjust brightness and color settings. Refer to the operating guide for detailed instructions.
- Clean the lamp with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- Ensure the lamp is connected to the correct voltage and power source as specified. Avoid overloading the circuit.
- If the lamp does not turn on, check the power connection.
- Dispose of the lamp in accordance with local regulations for electronic waste. Do not throw it in the regular trash.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
