- Use a clean, soft, dry cloth to clean the camera, light sensor lenses. Prohibit the use of harmful chemicals and cleaning agents to clean the phone.
- Manufacturer manufacturers recommend that a minimum separation of 5mm be maintained between a mobile phone and a pacemaker to avoid a potential interference with the pacemaker (when the device is used in the USA, the separation distance can be maintained at 10mm between users' body and handset). To achieve this use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.
