Precautions for use

To ensure the quality of translation and the integrity of the sentences, press the translation key and then, after 1 second, you will be asked to translate the sentence.

Please use normal speed to speak coherently, please do not stop many times during the speech, or two sentences and say that the above situation is easy to cause the translation is not allowed, please try to avoid.

Try to avoid catchphrases or local slang.

After talking, you can check what you have said through the text displayed on the screen.

When using a translator for charging, the heat of the machine is normal.

If you choose Chinese recognition, but the translation is not accurate, you can try to change another expression.

About us

Intelligent translation is a positive initiative and innovation of NingQu technology company. It was born to eliminate the linguistic and semantic problems that arise between native speakers and non-native speakers. The vibrant modern technology and the perfect integration of human linguistic diversity make **Intelligent translation** the best translator so far.

With **Intelligent translation**, you can finally claim to use multiple languages. **Intelligent translation** supports more than 26 world languages, enabling you to communicate wherever you want. Now you can travel anywhere in the world without having to worry about communicating with the locals.

Intelligent translation ensures accurate translations and eliminates misunderstandings that usually occur between native speakers and non-native speakers.

support for translation:

Mandarin English Japanese Arabic polish Danish German

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

The SAR limit adopted by USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The highest SAR value reported to the Federal Communications Commission (FCC) and the Industry Canada (IC) for this device type when it is properly worn on the body is **1.238 W/kg**.

The device complies with the RF specifications when the device is used near at a distance of 5 mm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 5 mm away from your body to meet the requirement earlier mentioned.

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **5 mm** must be maintained between the user's body and the handset, including the antenna. Thirdparty belt-clips, holsters, and similar accessories used by this device should not contain any metallic components.

Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
