

2. The device to be charged can be connected to this product using a Type-C charging cable or charged using the built-in Type-C cable of this product;

3. When using magnetic wireless charging, place this product directly close to the back of the phone that supports wireless charging to automatically trigger wireless charging, turn on the power bank and wireless charging output. The maximum wireless charging power for iPhone 12-16 series phones can reach 15W, and for other phones and headphones that support wireless charging, it can support up to 5W; When charging wirelessly, the button indicator light displays green;

4. When 2 or 3 devices are charging simultaneously, the maximum output power of the portable power bank is 15W;

5. Click the power button to turn on the power and wireless charging output, and the remaining battery level can be viewed through the LCD screen. At this time, press and hold the power button for 2 seconds, and the last digit of the digital display will intermittently rotate to turn on the low current mode. Double click the power button to turn off the power bank.

Precautions

1. When using a portable power bank for the first time, it is necessary to discharge the power first and then fully charge it.

2. Please do not disassemble, modify, or repair the machine by yourself.

3. It is strictly prohibited to continuously expose the product to objects or heat sources above 55°C. It is also strictly prohibited to throw the product into fire or water, and it is strictly prohibited to charge the product in an environment below 0 °C.

4. Do not vigorously vibrate, knock, or impact this product. If the product is accidentally subjected to strong collision or compression, or if it falls from a height of more than 1 meter, the shell is deformed, bulges, or other situations occur, stop using this product.

5. When using a power adapter to charge a portable power bank, in order to avoid any abnormalities with this product, it is recommended to purchase a power adapter that has been certified and meets the standard requirements.

6. Please dispose of discarded power banks in accordance with environmental regulations.

7. If the portable power bank is not used for a long time, please charge and discharge the battery at least once every three months.

Warning: Please use this product according to the attached instructions. Ignoring the instructions may result in the product catching fire or other damage. Do not allow children to come into contact with this product.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference and
- (2) this device must accept any interference received including interference that may cause undesired operation changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF warning statement: the device has been evaluated to meet general RF exposure requirement, The device can be used in portable exposure condition without restriction.
