General Safety

- The thermometer is **only** intended to measure the temperature of meat during cooking.
- It is recommended to use USDA-recommended safe minimum internal temperatures to cook different meats to avoid food poisoning caused by raw or undercooked meat and seafood.
- **Do not** hit the probe tip against hard surfaces to avoid causing damage.

- Keep out of reach of children.
- **Do not** tamper with the thermometer's internal components.
- **Do not** dispose of any part of the thermometer in a fire.
- **Do not** use your thermometer if it is damaged, not working, or if the charging case is damaged. Contact **Customer Support** (see page 13).

In this case, recycling or recovery centers handle the dismantling of the product and the removal of the battery. If, for any reason, it becomes necessary to replace such a battery, this procedure must be performed by authorized service centers. In the European Union and other locations, it is illegal to dispose of any battery with household trash. All batteries must be disposed of in an environmentally sound manner.
