Family-Letter for FCC certification process FCC ID: 2AQSQ-FSSF

Dear Sir or Madam,

hereby we declare that the variants SF-HR and SF-LR of our sensor underlay belong to the same family and do not differ with respect to their active components. As can be seen in the attached images, both variants contain identical electronics modules SM14C (brown squares, right) equipped with identical firmware. The only difference is in the geometry of the textile underlay the modules are embedded in. While SF-HR (middle) contains four identical electronics modules per square meter, the cheaper variant SF-LR (left) contains only two electronics modules per square meter. This results in a different spatial accuracy with which people are localized when they walk across a floor equipped with one of the two variants.

Yours sincerely

A. Steinhage

Dr. Axel Steinhage
Director R&D
