

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup in an anechoic chamber. A white test table is positioned in the center, with a black metal frame structure around it. The walls are covered with white, square-shaped absorbers. The floor is dark and reflective.
Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup in an anechoic chamber. A white test table is positioned in the center. A bright blue light source is visible on the left, illuminating the scene. The walls are covered with white, square-shaped absorbers. The floor is dark and reflective.

Radiation Emission Test Setup (1GHz to 18GHz)	A photograph showing a radiation emission test setup for the 1GHz to 18GHz range. A white, rectangular test item is placed on a white, stepped platform. To the left, a large, black, horn-shaped antenna is mounted on a white, cylindrical base. The background is a white, square-patterned wall. The floor is covered with black, conical absorbers.
Radiation Emission Test Setup (Above 18GHz)	A photograph showing a radiation emission test setup for frequencies above 18GHz. The same white, rectangular test item is on the white, stepped platform. To the left, a smaller, gold-colored, horn-shaped antenna is mounted on a white, cylindrical base. The background is a white, square-patterned wall. The floor is covered with black, conical absorbers.

* Means' only test and setup for PART 15C .
