

USB Bluetooth Dongle USER GUIDE

Status Indicator

Standard: Bluetooth V5.0

Pairing Distance: within 30cm

Compatibility: Plug and Play for Win 10/ Win 7, driver-free

Transmission Distance: Max,20 meters without obstacle.

Special Function: can answer/end calls via certain headset models, support only calls from Microsoft Teams and Skype for Business.

Set Up:

1. Plug the dongle into any USB port on the computer.
2. Put the headset close to the dongle(less than 30cm), turn on the headset, the blue status indicator flashes during pairing.
3. It takes about 30 seconds for pairing to be successful.
4. The blue status indicator will be continuously on after pairing successfully.

Very Important:

- * The first time you connect the dongle with your Bluetooth device, it takes about 30 seconds for pairing to be successful. Please be patient! After that, it will connect fast and automatically with the last paired device within 10 meters (depending on different devices) when powered on.
- * To connect the dongle with new device, please turn off Bluetooth of the paired device and re-plug the dongle into USB port on the computer.

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
