| Test Setup | Radiated measurement for Below 1 GHz (Front side)                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|            |  A photograph showing the front side of a radiated measurement setup. A black, rectangular device is placed on a white, stepped platform. The background is a wall made of white, square, pyramidal-shaped absorbers. In the foreground, several horizontal metal rods are visible, likely part of a measurement structure. The floor is light-colored with yellow and black safety tape markings. |
| Test Setup | Radiated measurement for Below 1 GHz (Rear side)                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|            |  A photograph showing the rear side of the radiated measurement setup. The black device is on the same white platform. The background wall of white absorbers is visible. In the foreground, several vertical metal rods are visible, part of the measurement structure. The floor has yellow and black safety tape markings.                                                                     |

| Test Setup | Radiated measurement for below 30 M (Front side)                                     |
