

# Operation manual

## Gravity Auto

### GRAVITY AUTO Usage

- Always push phone firmly onto product and ensure it is held well before driving
- When removing phone, hold product at vent or dash mount while gently pulling phone away starting from one side.
- Before use in the car, attach phone and determine if phone sticks sufficiently. If more adhesion is desired, remove upper half circle and re-test. For the most adhesion, remove upper and lower half circles.
- Sticky surface naturally attracts dust and typically needs refreshed weekly or sooner. Renew the surface every 2 weeks by rubbing with water on your hand and allowing to air dry.
- Never use a cloth or other material to renew sticky surface.

## 2. Product advantages

1) the product is of high sensitivity , intelligent recognition,

put a charge; After charging, automatically enter standby

mode of the product;

2) charge for all QI compliant product .

3) efficiency can reach more than 70% ,less heat;

4) in the process of charging can be free to pick up, answer the

phone , freeing discharge or charge;

## **The third wireless charger's charging method**

1). Insert the USB cable into computer or power adapter.

2). Place the phone on the wireless charger in vertical or horizontal position as shown.

3).LED will turn on when charging.

4). When the charging equipment complete, can be taken away;

Products applicable: all qi wireless charging equipment accorded with QI standard;

Charging type: one-on-one charge corresponding area;

The input voltage:DC:5V-2A;9V-1.67A

Launch distance:4 to 6 mm;

Conversion efficiency:  $\geq 70\%$ ;

Charging methods: induction model;

Working frequency:110-205 KHz;

Accessories/components name: USB cable, Wireless charging pad ,Packing box, AC adapter(Selective).

### **FCC Warning**
