FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:
To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body.

FCC ID: 2AS50-S071B

INSIDE

GETTING STARTED:

Package Includes: • Stellaris Projector • USB Power Cable • Remote Control • User Manual	Projector Setup • The projector is USB powered. Connect to any standard USB power source using the included cable. • The Projector works best in darker spaces with limited light distortion.
--	---

USING THE LASER LIGHT

- Connect the USB cable to the laser light and then plug into any standard power source.
- Power on the Laser Light using the included remote or the power button located on the base of the light.
- Use the base of the light or the included remote to customize the colors and effects.
- **Note: The lights will automatically turn off after 4 hours of inactivity to reserve battery.**

CONNECTING TO SPEAKER VIA BLUETOOTH

- The speaker is ready to pair with your device when powered on if there is no USB port connected.
- Locate the Bluetooth Menu in your smart device and search for "Merkury MI-S071B" in the Pair New Device section. It may take a minute to appear.
- Tap 'connect' and a tone will emit to confirm your connection!
- All audio, including music, media, and calls will play through the speaker.
- Speaker will automatically reconnect to your device every time it is in range and the device is powered on.
