

BEZALEL Altair Wireless Charging Stand
BZALTAIR

User Guide

QUICK START OPERATION

1. Plug USB-C end of cable into input port.

2. Plug standard USB end of cable into power adapter (not included).

- * For fast charging, use only safety-approved QC2.0 or QC3.0 adapter of 9V / 1.67A.
- * Fast-speed charging feature applies only to mobile devices that support fast wireless charging. Standard speed charging applies to other mobile devices.

3. Place the Qi-enabled mobile device on the wireless charging surface vertically or horizontally.

4. LED indicator will glow to confirm charging is underway.

SAFETY & HANDLING

1. Keep wireless charging unit dry and away from liquids. Do not use on wet surfaces.
2. Do not attempt to disassemble or modify charger.
3. Always disconnect power supply before cleaning charger.
4. Keep away from high heat. Use in temperature range between 0 and 45 degrees Celsius (32 and 113 degrees Fahrenheit).
5. Phone case cannot have any ring attachment, credit card, metal or magnetic sticker. This may cause overheating and affect the wireless charging process.

PACKAGE CONTENTS

Altair fast wireless charging stand x1
Type C USB cable x 1
User guide x 1

SPECIFICATIONS

Input 5V = 2A, 9V = 1.67A
Output 5V, 9V
Charging Distance ≤ 8 mm
Charging Efficiency ≥ 72%

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

RF Exposure: A distance of 15 cm shall be maintained between the antenna and users, and the transmitter may not be co-located with any other transmitter or antenna.
