| <div>Solder<br/>Board-Component View<br/>7</div> |  A photograph of a small green printed circuit board (PCB) component, labeled '7', positioned on a blue textured surface. The component is rectangular and features several silver-colored solder joints and components. It is placed next to a metal ruler for scale, which shows centimeters and millimeters. The ruler is marked from 1 to 8 cm, with millimeter markings every 0.5 mm.                                                             |
| <div>Solder<br/>Board-Component View<br/>8</div> |  A photograph of a larger green printed circuit board (PCB) component, labeled '8', positioned on a blue textured surface. The component is rectangular and features various electronic components, including a large black integrated circuit (IC) and several smaller components. It is placed next to a metal ruler for scale, which shows centimeters and millimeters. The ruler is marked from 1 to 8 cm, with millimeter markings every 0.5 mm. |

| <div>Solder<br/>Board-Component View<br/>9</div>  |  A photograph of a small green printed circuit board (PCB) component. The component is rectangular with a black integrated circuit (IC) mounted on its top surface. It is positioned next to a metal ruler for scale. The ruler shows centimeters from 1 to 10 and millimeters from 0.5 to 10. The component is approximately 4 cm long and 1.5 cm wide. The background is a blue textured surface. |
| <div>Solder<br/>Board-Component View<br/>10</div> |  A photograph of a Western Digital 1TB SC-H4500 surveillance hard drive. The drive is a 3.5-inch SATA drive with a silver metal casing. It is positioned next to a metal ruler for scale. The ruler shows centimeters from 1 to 22 and millimeters from 0.5 to 22. The drive is approximately 14 cm long and 7 cm wide. The background is a blue textured surface.                                 |
