Headphones x 1 Pair Type-C Charging Cable x 1 Case Protector x 1
Charging Case x 1

* Above functions are available for either earbud in individual or Stereo mode.

• To pair the headphones, turn them on normally, when powered on, open the case and quickly press the pairing button 3 times to reset the Left & Right pairing process.
• To unpair the headphones:
• Push both L & R into the case, and then press and hold the pairing button for 8 seconds.
• OTA Firmware Update: can be done synchronously with iMORE MUSIC APP when Left & Right headphones are both paired to each other.
• Functions of iMORE MUSIC APP may vary with different iPhones or operating system.
• For more details, please contact our customer service.

We know you will enjoy new T-MORE headphones as much as we do. At T-MORE, we value your satisfaction. If you would like more details on this product or any of our other products, please visit us online by scanning the QR code. Go to www.tmore.com and sign up for VIP, and T-MORE will treat you like one.

1. Please fully charge the battery before first use.
2. If the headphones have been unused for more than 3 months, we recommend that you charge them. This will improve battery capacity.
3. Only use charging cables and adapters that are FCC (Federal Communications Commission) approved.
4. In dry environments, static electricity may numb your ear. This is not related to the quality of the headphones.

- 2. Never disassemble the headphones. There are no user-serviceable parts inside.
- 3. Do not expose the headphones to temperatures below 32 °F (0 °C) or to temperatures above 113 °F (45 °C).
- 4. Do not use the headphones in a thunderstorm storm. This could prevent the headphones from working properly, and also increase your chance of being electrically shocked.
- 5. Do not use oil or any volatile liquid to clean this product.
- 6. Do not listen at high volumes for extended periods of time.
- 7. Do not use the headphones in traffic. Do not use the headphones any time it would be dangerous to be unaware of noises around you.
- 8. Adult supervision is required for children of age 6 and under.

Electrical and electronic equipment, parts and batteries marked with this symbol must not be disposed of with normal household waste. It must be collected and disposed of separately to protect the environment.

Your MOWE retailer will advise you of the correct way of disposal in your country.

Do not expose batteries or battery packs to excessive heat such as sunlight, fire or the fire.

Declaration of Conformity: Hereby, Tishab Acoustic Technology Limited declares that the radio equipment type 1MORE ComfoBuds + of ESS0001P is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: <https://tishab.com>

Declaration for EU Compliance
Operation (Exposure) 350W, EIRP 3400-2460MHz 350W, EIRP is 0.22dBm

The device has been evaluated to meet general RF exposure requirements. The device can be used without restriction. Federal Communications Commission (FCC) Radio Exposure Statement: Power is so low that no RF exposure calculation is needed. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's warranty.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and uses radio frequency energy and, if not properly installed and used, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to other electronic equipment, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

(f) this device may not cause interference, and (g) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec l'inductible Canada R506 exemples de licence standard. Son fonctionnement est soumis aux deux conditions suivantes:

(f) cet appareil ne peut pas provoquer d'interférences, et (g) cet appareil doit accepter toute interférence, y compris celles pouvant causer un mauvais fonctionnement de l'appareil.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada.

Reduction Exposure Statement
The product complies with the Canada portable RF exposure limit set forth for an uncontrolled environment and is safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user's body or use the device to lower output power if such function is available.

Declaration des Expositions aux radiations:
Le produit est conforme aux limites d'exposition pour les appareils portables RF pour les Emission de Canada (dispositif pour un environnement non contrôlé).
Le produit est sûr pour un fonctionnement tel que décrit dans ce manuel. La réduction aux expositions RF peut être augmentée si l'appareil peut être conservé aussi loin que possible du corps de l'utilisateur ou si son dispositif est réglé sur la puissance de sortie la plus faible si une telle fonction est disponible.
