

Model Differences Letter

FCC ID: 2ASEL-VEX17

Product: VEX1712

Variants: VEX1712S1, VEX1712S2, VEX1712SPH1, VEX1712OTR1, VEX1712EXT1, VEX1712EXT2

All variants have the same PCB layout, schematic and partlist. They also have the same antenna, plastic cap and valve core.

The standard variant is VEX1712S1.

Other variants differ from VEX1712S1 in terms of:

- size, weight and form factor (VEX1712OTR1, VEX1712EXT1, VEX1712EXT2)
- customizable parameters (VEX1712S2, VEX1712SPH1)

Please note that the customizable parameters are: transmission interval (which cannot be in any case less than 10 seconds), transmitted frame format, pressure threshold values and various timings related to state transitions, but are not related in any case to radio performance, which is fixed and independent from these parameters. Furthermore, the parameters are set in production site before assembling the product, and cannot be changed later.
