

Cover Letter for FCC application

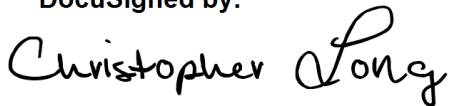

SonicSensory, Inc is submitting our EP 01 product to the FCC for original certification on applicable FCC rule part 15.247:2019. The EP 01 (also referred to as project "Jonah") is a wearable Bluetooth haptic device, which consists of two separate/non-tethered modules (a Left and Right). Some exhibits included in this application are being used to support two different filings.

The EP 01 (Left) contains a CSR8670 Bluetooth IC running Bluetooth Classic 4.2, and a TI CC2564C Bluetooth IC running Bluetooth Classic 4.2.

The EP 01 (Right) contains a CSR8670 Bluetooth IC running Bluetooth Classic 4.2. Both the Left(master) and Right modules are the same hardware without the CC2564C Bluetooth populated.

This application is for EP 01 (Left); FCC ID: 2ASGN-EP01.

DocuSigned by:

A handwritten signature in black ink that reads "Christopher Long". The signature is written in a cursive style with a large, stylized "L" and "g".

Christopher Long
