

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device, specifically the battery and a small black component, placed next to a ruler for scale. The ruler is marked in centimeters and millimeters. The background is a blue textured surface.
EUT Housing and Board View 2	 A photograph showing the internal components of a device, specifically the battery and a small black component with a fuzzy microphone, placed next to a ruler for scale. The ruler is marked in centimeters and millimeters. The background is a blue textured surface.

EUT Housing and Board View 3	 A photograph showing two electronic components on a blue textured surface. On the left is a small green printed circuit board (PCB) with a gold-colored connector. To its right is a black, rectangular component, likely the EUT housing. A black L-shaped ruler with white markings in millimeters is positioned to the left and below the components for scale.
Solder Board-Component View 1	 A close-up photograph of a small blue PCB component. The component has several surface-mounted components, including a silver-colored square component and a small blue component. A black L-shaped ruler with white markings in millimeters is positioned to the left and below the component for scale.

Solder Board-Component View 2	 A photograph showing a small, rectangular electronic component (likely a microcontroller or sensor) mounted on a blue printed circuit board (PCB). The component is positioned near the bottom edge of the board. A black L-shaped ruler is placed next to the component for scale, with markings in millimeters. The background is a light blue textured surface.
Solder Board-Component View 3	 A photograph showing the same electronic component from a different angle (View 3). The component is mounted on the blue PCB. A black L-shaped ruler is placed next to it for scale. The background is a light blue textured surface.
