

Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) component, labeled '6', showing its solder side. The board is rectangular and populated with various electronic components, including a large silver heat sink, several integrated circuits, and surface-mount components. It is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters.
Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) component, labeled '7', showing its solder side. The board is rectangular and populated with various electronic components, including a large silver heat sink, several integrated circuits, and surface-mount components. It is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters.

Solder Board-Component View 8	 A photograph of a green printed circuit board (PCB) with various electronic components. A black ruler is placed vertically on the left side of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board features a large black integrated circuit (IC) in the center, several smaller ICs, resistors, and capacitors. A white component is visible on the right side. The board is set against a blue background.
Solder Board-Component View 9	 A close-up photograph of the same green PCB, focusing on the central area. It shows a large black IC with a white label, surrounded by numerous smaller components like resistors, capacitors, and other ICs. The board is set against a blue background.
