

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment is on a wooden bench. To its right, a power supply unit sits on the floor, connected to a wall outlet. On the right, another wooden bench holds a power strip and a small electronic device. The background is a plain wall.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped absorbers. A black metal frame stands in the center. In the foreground, a large black cylindrical object is partially visible. A small electronic device is placed on a white table inside the chamber.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz range. The setup is located inside an anechoic chamber with white pyramidal absorbers on the walls. A test item is mounted on a white table. A large, silver, cylindrical probe is positioned vertically above the test item. Two bright spotlights are visible on the wall, illuminating the scene.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz range. The setup is located inside an anechoic chamber with white pyramidal absorbers on the walls. A test item, which is a rectangular box wrapped in yellow tape, is mounted on a white table. A red probe is positioned to the left of the test item. The floor of the chamber is covered with blue pyramidal absorbers.

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
