The Leader Kids Pro
QUICK GUIDE

- English
1. For more information
Consult the quick start reading box.
Open system device and search following links:
Consult the manual
Get the trouble-shooting manual each to self-service, intelligent purchasing and
avoid the technical support trouble to confirm you can search items,
internet network, and service policy.
- Open settings/About tablet or user information, consult for information.
2. Tablet operation

3. Self-installation guide
- Step:
Pay attention to the direction of inserting SIM & Micro SD card, as the
direction is different.
Please use the provided SIM card and insertion of equal or larger size (single
Micro SIM card insert).
4. Mobile network
1. Insert with SIM card through the back of power button.
2. Follow cover lid and screw hole cover.
Setting Network (network) to network, connect AC line.

5. Safety information
- Recharge or uncharged power supply, charges, and battery may cause fire,
explosion, or other hazards.
Only the accessories accepted by the manufacturer and marked with the type
can be used. Any type of accident may cause accident and cause the warranty
and related customer's request. Please contact with technical service center for
recharge accessories.
- Please do not use high voltage for long time in outdoor use.
- Please use the device at the temperature from -20°C to 35°C. Too high or too low
temperature may cause device to be no.
Do not expose the device or battery to high temperature place or heat-resisting
equipment, such as candles, heater, microwave oven, water heater, etc. Battery
overheat during some operations.
- When charging the device, power jack should be equipped at place near device
accessory.
- Please disconnect the charger with this device, and analog in when it charged will
be damaged.
- If the device is equipped with non-removable internal battery, do not replace the
battery in case of battery or device damage. The battery can be only replaced by
authorized service center.
- The device, battery and other accessories should be disposed in accordance with
local regulations instead of trying them as general garbage. improper battery
disposal may cause battery explosion.
6. Precaution
- Upgrading firmware and system with unauthorized third party software may cause
irreversible failure or personal data loss or damage.
- Online operating and downloading of installed official software are
recommended.
- Please backup you personal information before upgrading your personal information
to prevent.

7. Safety standards
- Content of harmful substance in this homogeneous material is below the limit of
REACH/ROHS standard.
- The harmful substance content of this homogeneous material at least exceed the
limit of REACH/ROHS standard. However, there is no better alternative at mean.
Thus, it exceeds the environmental protection requirement of REACH.
- The number of this type released over its normal life is 20 years. These
materials may also contain other type and the number is not large enough. This
product may not include all the accessories due to different region, and it is suitable
subject to be used (refrigerator).
- | RoHS/REACH | |
|---|------|
| Hazardous substance | |
| Item | Unit |
| Lead | g/kg |
| Cadmium | g/kg |
| Mercury | g/kg |
| Chromium | g/kg |
| Polychlorinated biphenyls (PCBs) | g/kg |
| Polycyclic aromatic hydrocarbons (PAHs) | g/kg |

FCC: FCC Part 15, Subpart B, Class B

8. FCC Warning
- Any changes or modifications not expressly approved by the party responsible for
compliance could void the user's warranty to extend the compliance.
- This device complies with part 15 of the FCC Rules. Operation is subject to the
following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that
may cause undesired operation.
- Note: This equipment has been tested and found to comply with the limits for a
Class B digital device, pursuant to part 15 of the FCC Rules. These limits are
designed to provide reasonable protection against harmful interference in a
residential installation. This equipment generates, uses, and can radiate radio
frequency energy and, if not installed and used in accordance with the instructions,
may cause harmful interference to radio communications. However, there is no
guarantee that interference will not occur in a particular installation. If this
equipment does cause harmful interference to radio communications, which
can be determined by turning the equipment off and on, the user is encouraged to
try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the
receiver is connected.
 - Consult the dealer or an experienced radio/television technician for help.
- Additional information: This equipment complies with the FCC's radio frequency
exposure requirements. Operation of this equipment near a mobile phone, which
operates at a higher power level, should be avoided. The highest recorded power
level, the actual SAR level of the phone while operating, can be found in the
operator's manual. To prevent the device you are using from exceeding the exposure
limits, the lower the power is better.

- Before a new model phone is available for sale in a particular country, it must be tested and
certified to the FCC that does not exceed the exposure limit established by the FCC.
Note: For each phone, the FCC has established a maximum SAR level, and the user and
operator of the device must not exceed the FCC's SAR level.
For body worn operation, this device has been tested and meets the FCC
exposure guidelines when used with an accessory designed for this product or
when used with an accessory that contains no metal and that protects the handset
a minimum of 15 cm from the body.
Following placement with the above conditions may result in violations of FCC exposure
guidelines.
- As the device is sold by Google LLC.
