Declaration for Bluetooth technology

As the manufacturer of the component model: IC-CPD, hereby declare:

The IC-CPD is a charging electric vehicles device for BEV and PHEV with integrated protection to avoid overheating and electrical hazards. It includes WLAN-communication for value added services and Power Line Communication (PLC) (Bentley has deactivated PLC).

The Bluetooth functionality will not be part of the announced components and is not used in this application.

The end user does not have the possibility to reactivate the BT function in any way.
