Indicator Light Colors	Sound Channel
Blue/Red	Stereo
Purple	Left Channel
Yellow	Right Channel

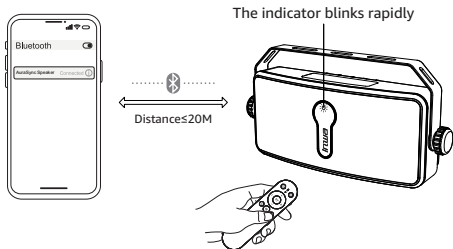

2. Each speaker can be independently configured in **Main** or **Aux.** mode, primarily distinguished by blinking indicator patterns.

Slow Blinking	Aux. Speaker

OPERATION INSTRUCTION

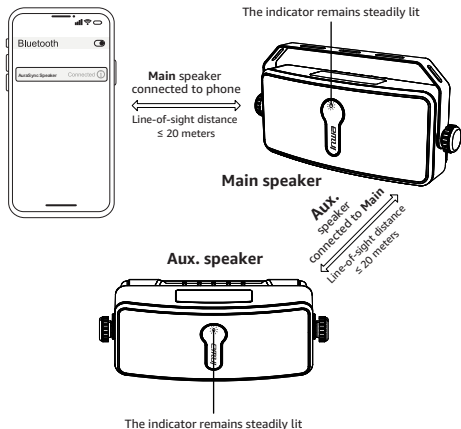

1. Bluetooth connection:

Press the power button "⏻" briefly to turn on one speaker. The indicator will blink rapidly. Enable Bluetooth on your phone, search for "AuraSync Speaker" and connect to it. The speaker will now function as the **Main** speaker device. (Note: If the indicator does not blink rapidly after power-on, briefly press the Bluetooth mode switch button "✳" on the remote until rapid blinking occurs. Bluetooth devices can only be connected when the indicator is blinking rapidly.)

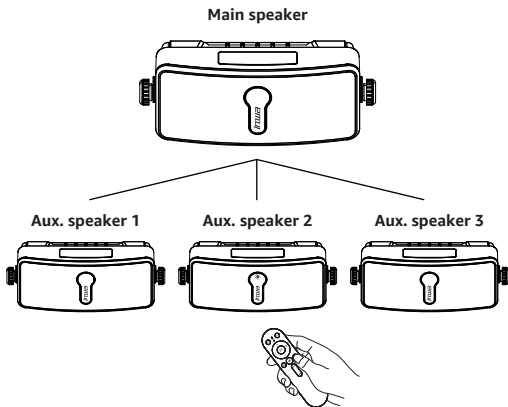

2. Wireless pairing of multiple speakers:

Power on another speaker. When the indicator blinks slowly, the Aux. Speaker will automatically pair with the **Main** speaker. Note: If the indicator does not blink slowly after the **Aux.** speaker is powered on, briefly press the Bluetooth mode switch button "✳" on the remote to change the indicator to a slow blink. In this state, the speaker will be in **Aux.** speaker mode and can automatically connect to the previously paired **Main** speaker.

When the **Main** and **Aux.** speakers complete wireless pairing, their indicators will remain steadily lit respectively.

*Schematic diagram of **Main** and **Aux.** speakers unit connection:
Use the "❄" Bluetooth mode switch key on the remote to set any speaker as **Main** speaker (fast-blinking indicator) or **Aux.** speaker (slow-blinking indicator). **Main** speaker can connect to audio devices like phones for multi-speaker wireless collaboration, or operate independently as a standalone **Main** speaker.

3. To connect the speaker to a new device:

Long press the "❄" Bluetooth mode switch key on the remote to disconnect the current Bluetooth connection. When the indicator flashes rapidly, the speaker is ready to pair with a new device.

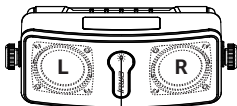

4. Audio Input Switching:

Short press the Mode button "M" on the remote to switch the speaker between Bluetooth and 3.5mm Aux-in mode.
