

Safety Notice

- Do not expose your device to liquid, moisture, humidity or rain while charging; do not charge your device when it is wet, as it may result in electric shock and injury.

- This product is NOT a toy – never allow children or pet to play with this product. Always store the product out of reach from children. The devices themselves or the many small parts they contain may cause choking if ingested.

- Never try to abuse, crush, open, repair or disassemble this device. Doing so will void the warranty and can result in a safety hazard.

- If any parts of your product require replacement for any reason, including normal wear and tear or breakage, please contact us.

- Do not use your device in a sauna or steam room.

- Do not bring your device into contact with any sharp objects, as this could cause scratches and damages.

- Do not use the device in any way illegal.

Specifications

Product Name	GSM Wireless Data Terminal	
Model	T1	
Network Specifications	Frequency	GSM 850/900/1800/1900MHz
	Rate	DL:85.6kbps UL:85.6kbps
	SIM Card	Built-in eSIM
Bluetooth	Function	Two-way alert
GNSS	Positioning	GPS/GLONASS+LBS, Support AGPS
	Accuracy	Less than 5 meters
Size	54*30*16mm	
Weight	24.6g (Battery included)	
Voltage	3.85V	
Battery Capacity	780mAh	
Working temperature	-10°C ~ +50°C	
Manufacturer	iFREE GROUP (HK) LIMITED	
Input	5V  2A Max	

* The maximum Bluetooth signal range between your smart phone and MOGO T1 unit is 50 meters in open area while it's 20 meters when staying indoors.

Warranty

If within 7 days of purchase this product or any part thereof is proven to be defective by reason of faulty workmanship or defect in material, we will repair or replace the said product free of charge.

CE Warning:

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 5mm must be maintained between the user's body and the device, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna. This device in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.

1. CAUTION : RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

2. The device complies with RF specifications when the device used at 5mm from your body.

FCC Warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure information and Statement The SAR limit of USA

(FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: T1 (FCC ID: 2AT7I-T1) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the body is 1.321W/kg. This device was tested for typical body-worn operations with the back of the device kept 5mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 5mm separation distance between the user's body . The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation:

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 5mm must be maintained between the user's body and the device, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
