

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the back of a black plastic EUT housing. The housing is placed on a blue textured surface next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters. The housing has a small gold-colored connector at the bottom. A small, rectangular, gold-colored component is placed next to the housing for scale.
EUT Housing and Board View 2	 A photograph showing the internal components of the EUT housing. The green printed circuit board (PCB) is visible, featuring various electronic components, including a large silver capacitor, a gold-colored connector, and a small gold-colored component. The housing is placed on a blue textured surface next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters.

EUT Housing and Board View 3	 A photograph showing the internal components of the EUT housing and board. The components are laid out on a blue textured surface next to a black ruler with white markings. The ruler is oriented vertically, with the 0 mark at the top and the 200 mm mark at the bottom. The components include a black plastic housing, a green printed circuit board (PCB) with various electronic components, a yellow battery, and a small white component. The components are arranged in a row, with the housing on the left, the PCB in the middle, and the battery and small white component on the right.
EUT Housing and Board View 4	 A photograph showing the external view of the EUT housing and board. The components are laid out on a blue textured surface next to a black ruler with white markings. The ruler is oriented vertically, with the 0 mark at the top and the 200 mm mark at the bottom. The components include a black plastic housing, a green printed circuit board (PCB) with various electronic components, and a yellow battery. The components are arranged in a row, with the housing on the left, the PCB in the middle, and the battery on the right.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) assembly, labeled 'Solder Board-Component View 1'. The board is positioned horizontally against a blue textured background. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features several components, including a white rectangular module with 'GEOSATIS' branding, a smaller green module with 'GEOSATIS' branding, and a larger green module with 'GEOSATIS' branding. The board is connected to a black ribbon cable on the right side.
Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) assembly, labeled 'Solder Board-Component View 2'. The board is positioned horizontally against a blue textured background. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features several components, including a white rectangular module with 'GEOSATIS' branding, a smaller green module with 'GEOSATIS' branding, and a larger green module with 'GEOSATIS' branding. The board is connected to a black ribbon cable on the right side.
