

Solder Board-Component View 3	
Solder Board-Component View 4	

Solder Board-Component View 5	 A photograph of a small, rectangular, yellowish component with a white connector and two thin wires (one red, one black) attached. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is approximately 10 mm long and 5 mm wide.
Solder Board-Component View 6	 A photograph of a larger, rectangular, gold-colored component with a central black circuit board and two thin wires (one red, one black) attached. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is approximately 100 mm long and 20 mm wide.

Solder Board-Component View 7	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a green printed circuit board (PCB). The component is connected to a yellow flexible ribbon cable. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 8	 A photograph showing four small, rectangular, green and white components, likely capacitors or small batteries, arranged in a 2x2 grid. Each component has a small blue dot and some text. They are connected to a multi-colored ribbon cable. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
