VI. Inapplicable for: - Infants; - People without ability of self-care. VII. Warranty Clause - Based on the national guidelines on warranties for repairs, replacements and returns, from the date of purchase, we will accept returns within 7 days, and offer replacements within 15 days as well as 1 year of complimentary maintenance services (for product wear and tear only). - The following is outside the scope of this warranty (including, but not limited to): improper use, using the device beyond the recommended operating conditions; product has been tampered with by non-authorized repairs or damage to product is man-made (including	improper operation); beyond the validity periods specified in the clause on warranties for repairs, replacements and returns; using the product beyond what it is designed and intended for. - The Warranty Card must be included with the product when the product is sent back for repair. - The company reserves the right to amend the warranty clauses and interpret these clauses. Tips: Long time heating may lead to pore expand and cold air intrude into body so as to aggravate symptoms. Please pay attention to keep warm after using our products
What is Graphene? Graphene is a flat film consists of carbon atoms, the lightest and thinnest new nano-material with the best hardness and toughness ever tested in the world. Due to its special nano-structure and superior physical-chemical property, Graphene has a brilliant prospect to be applied in such fields as electronics, optics, magnetics, biomaterials, catalysis, energy storage and spintronics. It is recognized as "future material" and "revolutionary material" of 21st century. Light of Life - Far Infrared Light of Life - Energy Source of Health Far infrared, discovered as early as 1,800 years ago, is an electromagnetic wave	invisible through naked eyes, part of sunlight and magic energy for life to grow up and is closely linked with living things on Earth. Space scientists has conducted researches on survival conditions of human in space ship under the condition of vacuum, weightlessness, ultralow temperature, overlow state and found that the far infrared with 6-14μm wavelength amidst sunlight is the indispensable element for life. Such light has the same wavelength as far infrared released from human body, so the light energy can be absorbed by human body to exchange with as well as transmit human energy. Thus, people call the far infrared with wavelength in the certain range "Light of Life". Portable Far Infrared Physical Therapy Ideal Light Physiotherapist for the Human Body
Infra-red spectrum of the human body Far Infrared Radiation Generated by the Device Compared with the Human Body Wavelength of the far-infrared radiation generated by the graphene heating film when it is in operation is similar to the far infrared wavelength of the human body at 6-14μm. When radiations with the same wavelength interact, a resonance effect is generated and when the biological cells are in resonance, the far-infrared heat can penetrate deep into the subcutaneous tissues, causing blood capillaries to dilate and hence promote blood circulation, boost tissue metabolism, increase cell regeneration, and strengthen the body's immunity, all these lead to better health.	Ten Key Effects of Far-Infrared Physical Therapy - Muscles bio-molecular activation - Analgic effect - Boosts metabolism - Treats pain in the joints - Strengthens immunity function - Relieves osteoarthritis - Stimulates beauty - Improves circulation systems - Anti-inflammatory effect - Improves blood circulation
FCC Warning: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. The equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help.	Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
