FAQ

What the effective distance between the phone and the device?

The effective distance is determined by the environment. In empty environment(Not obstructed place), it can reach a maximum of 40 meters. In office or home, there are walls or other barriers.the distance will be shorter about 10-20 meters.

How many devices can be added to one mobile phone at the same time?

Android support 4 to 6 devices according to different brands. iOS support 12 devices.

What is the battery type and how to replace the battery?

The battery is a CR2032 battery button. One battery can work for about 6 months. Hold the product with your left hand and the lanyard buckle with your right hand. Turn the lanyard buckle clockwise until you hear a "click". Open the case from the crack and take out the battery. With the positive side of the new battery facing up, insert the new battery, and then close the case.

How to unbind the device from the phone?

Tap  at the upper right cornerr to go to device settings, then tap "Remove Device"to unbind.

How to share the device to others?

Please follow below steps:

1. Confirm the added people has an account of Smart life App.
2. Find the "Share device" option, then tap "Add Sharing".
3. Enter his account to finish the sharing.

How to use the lanyard?

You can open the shell and put the lanyard into it, or use a thin needle to pass the lanyard directly.

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
