

This device FCC ID: **2ATK4LPPIR02345**

Prepared By: Howard Huang

Date: 2/3/2021

The maximum power that the transmitter is capable of is **0.73** mW Applied duty cycle? **No**

Using the following formula from section 4.3.1 of KDB 447498 at test separation distances  $\leq 50$  mm

**$[(\text{max. power of channel, including tune-up tolerance, mW}) / (\text{min. test separation distance, mm})] * [\sqrt{f(\text{GHz})}]$**

When the minimum test separation distance is  $< 5$  mm, a distance of 5 mm according to 5) in section 4.1 is applied to determine SAR test exclusion.

| Max Peak Power (dBm) | Min Separation distance (mm)* | Frequency (Ghz) |
|----------------------|-------------------------------|-----------------|
| -1.36                | 5                             | 0.345           |

| Value |
|-------|
| 0.09  |

"Value" shall be  **$\leq 3.0$  for 1-g** SAR and  **$\leq 7.5$  for 10-g** extremity SAR

$< 50\text{mm}$  power limits for above frequency and distance

|                        |                         |
|------------------------|-------------------------|
| <u>1-g power limit</u> | <u>10-g power limit</u> |
| 255                    | 638                     |
