

V900-BT

User Manual

Product Description

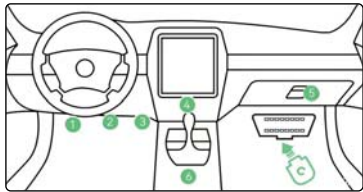

This product is mainly used for reading automotive engines/ transmissions/ ABS/ Airbag system malfunction, clear the fault code and read the OBD system data stream.

Main Functions

This product can monitor and diagnose the health status of vehicles, display detailed reasons for vehicle malfunction lights, read and clear fault codes, record vehicle travel data, AI intelligent diagnosis, and deeply detect car faults.

Search for OBD Interface

The OBD interface may be located in different positions on different vehicle models. (Usually located on the lower side of the dashboard on the driver's side of the car, above the accelerator pedal)

Insert the product into the OBD interface and start the car.

Software Download

1. Use a mobile browser to scan the QR code below.
2. You can also search for the software name "INNOOBD+" on Google Play or Apple Store to download it.

Android system

iOS system

Connect products

1. Insert the product into the car OBD interface and start the car, ensuring that the product indicator light is on.
2. Turn on Bluetooth on your phone
3. Open the software to automatically connect.

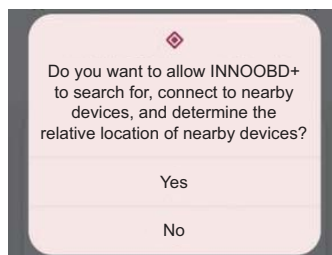

Note: Starting from Android 6.0, you need to enable location permission to search for Bluetooth devices!

1. Please turn on Bluetooth and GPS in the mobile control center
2. Enable location permissions and select (only allowed when using this application).

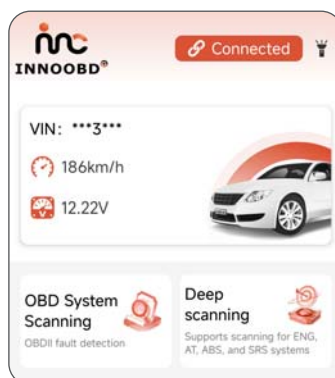

3. Enable nearby device permissions and select (Yes).

After the above preparations are ready, open the software and automatically connect to the OBD device.

Connection completed

The following interface will be displayed when the connection is successful.

Connection failed

You can click the 'Reconnect' button to connect.

The connection failure may have the following reasons

1. The OBD device needs to be unplugged and reconnected;
2. Ignition button not activated;
3. The system Bluetooth switch is not turned on.

More

Select the device name
'AVAPOW-V900-BT' to complete
the manual connection.

If the connection cannot be established, please confirm that the vehicle is running, reinsert the product, and re-enter the app to connect. If the connection still fails after all the above operations, then the vehicle does not support detection.

Warning Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
