

Download the Cocooncam App to create an account.

When you download the app, you will first create a CocoonCam account with a name, email, mobile phone number, and password.

Use your smartphone's camera to scan this code. It will direct you to the app store.

DOWNLOAD APP
cocoontcam.com/app

Follow the app instructions to get connected to Wi-Fi.

With the cord and power adapter provided, plug in the camera in, then refer to your phone to add the camera to your Wi-Fi network.

Use the Step 3 Mount Guide to mount the camera.

What you'll need to mount the camera to the wall:

Email us at hello@cocoontcam.com for free optional cable covers.

Follow steps on the app to calibrate your camera to your crib.

The mattress should fill the entire screen. You may have to do this step a few times to properly calibrate your camera.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

- If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
