Photo 9

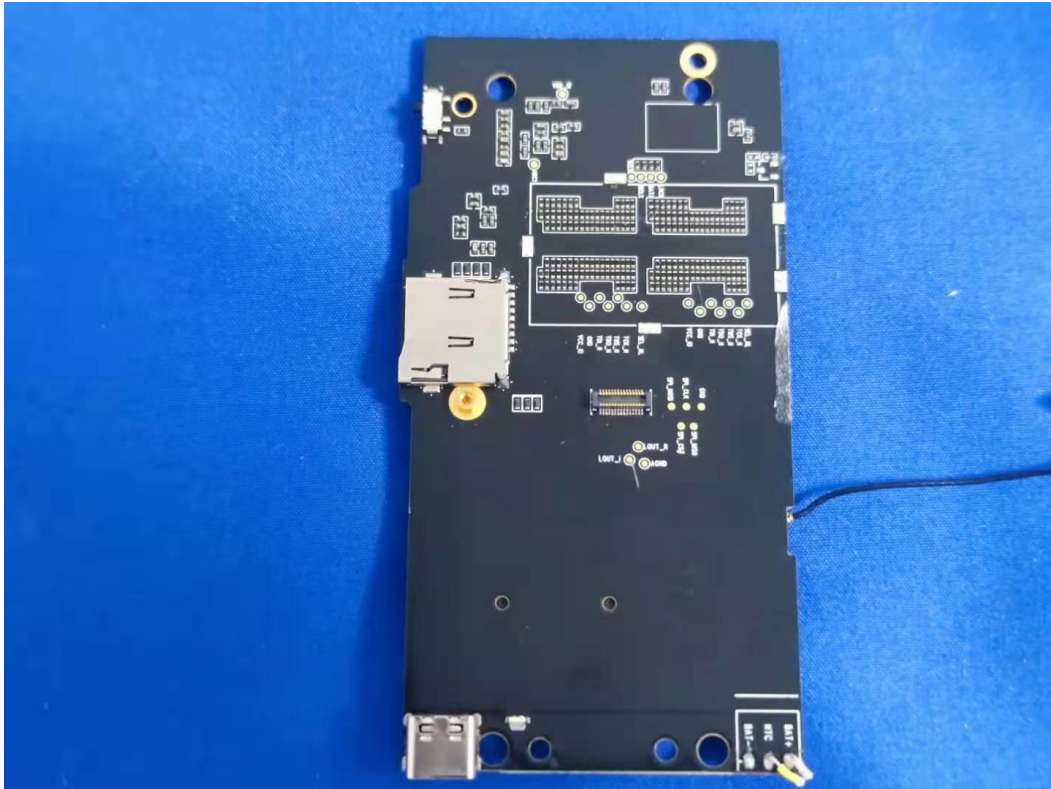

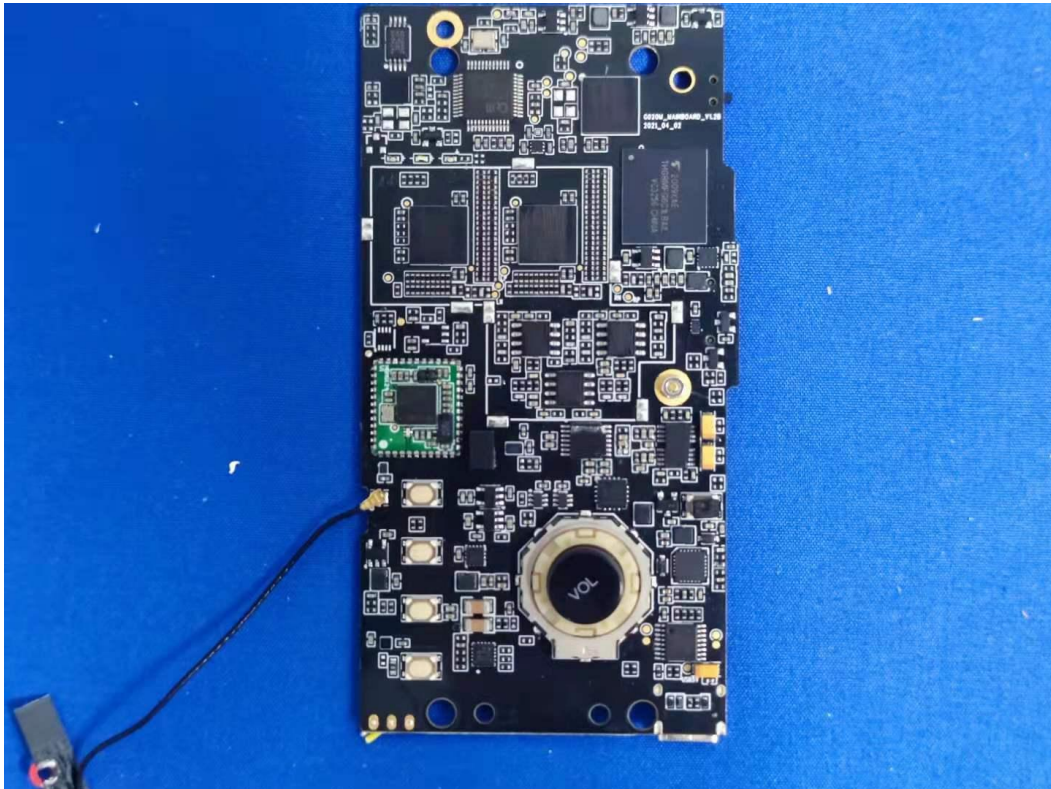

Photo 10

A close-up photograph of a laptop's internal hardware. The image shows a black printed circuit board (PCB) populated with various electronic components. In the center, there is a green daughterboard with a black integrated circuit (IC) labeled 'H80512-1'. To the left of this daughterboard, there are three circular components, likely capacitors or inductors, and a small black component. To the right, there are several rows of gold-plated pins, possibly for a display or keyboard. The background is a blue textured surface.
