

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) populated with various electronic components. The board is oriented vertically and placed on a blue textured surface. A black ruler with white markings is positioned horizontally at the bottom of the frame, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features a central integrated circuit (IC) labeled 'BerCode', several smaller ICs, resistors, capacitors, and a multi-pin connector on the right side. The board is populated with components, including a large black IC at the top, a smaller black IC in the center, and various passive components throughout.
Solder Board-Component View 5	 A photograph of the same green PCB from a different perspective, showing the underside. The board is oriented vertically and placed on a blue textured surface. A black ruler with white markings is positioned horizontally at the bottom of the frame, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The underside of the PCB shows various components, including a large black IC, a smaller black IC, and various passive components. The board is populated with components, including a large black IC at the top, a smaller black IC in the center, and various passive components throughout.
