④ Installation guide

- Connect one end of the HDMI cable into the HDMI port on Migu Box. Connect the other end into the HDMI port on TV.
- (Optional) To use an Ethernet cable (not included), connect into the Ethernet port.
- (Optional) Connect one end of the AV cable (not included) into the AV Port on Migu Box. Connect the other end into AV ports on TV.
- Plug the included power cable into Migu Box and then into a power outlet.

⑤ Tips and troubleshooting

Wired network

If you are having trouble with your Ethernet connection, verify that the Ethernet cable is properly connected, then restart your Migu Box.

Wi-Fi network

- Using the included remote control, go to the Settings menu in Migu Box, and select your network from the list displayed. If your network is hidden, enter your network name.
- If you see a lock icon, your Wi-Fi network requires a password, so make sure you have it available.

⑥ Safety instructions

This receiver has been designed and manufactured to satisfy international safety standards. Please read the following safety precautions carefully before operating the receiver.

◎ Main Supply:

Before operating the receiver, please check that the unit's operating voltage is 12V/1.0A.

◎ Working Temperature:

0~45 C

◎ Overload:

Do not overload a wall outlet, extension cord or adapter. Do not use a damaged power cord or touch it with wet hands as this may result in electric shock.

◎ Liquid:

The receiver shall not be exposed to dripping or splashing water. No objects filled with liquids, such as base, shall be placed on the apparatus.

⑥ Safety instructions

◎ Ventilation:

Keep the slots on top of the receiver uncovered to allow sufficient airflow to the unit. Do not put the receiver on soft furnishings or carpets. Do not expose the receiver to direct light and do not place it near a heater or in humid conditions. Do not stack other electronic equipment on top of the receiver. light and do not place it near a heater or in humid conditions.

◎ Cleaning:

Plug out the receiver from the wall outlet before cleaning it. Clean the receiver with a soft cloth or a mild cleaning solution (no solvents).

◎ Location:

Keep the receiver indoors to avoid lightening, rain or direct exposure to sunlight.

◎ Uncover:

To reduce the risk of electric shock, do not remove the cover. Contact qualified and licensed service personnel to repair the receiver, or contact your dealer.

FCC Statement

§ 15.19 Labeling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Operations in the 5.15-5.25GHz band are restricted to indoor usage only
