3 Appearance description

4 Bluetooth connection

Switch on Bluetooth, while keeping the watch on. Open the APP to connect your watch. Bluetooth pairing successful: the red light is on for 1 second.

5 Functions

Exercise	When the watch is activated, it will automatically record the number of walking steps, which is displayed in the APP when connected.
Intelligent Photo-taking	The watch enters the photo mode by turning on the camera and tapping the photo button in the APP, and then you can press the button once or flip the wrist to control the photo-taking.
Reminder	After the watch is connected to the APP, you can turn on or off the reminder for sedentariness, phone calls, and messages through the reminder function. You will be alerted by vibration when it is turned on. When alerted by an incoming call, you can hang up the phone by pressing the buttons on the watch.
Alarm clock	You can set the alarm clock by tapping the alarm clock button, and you will be alerted by vibration. The reminder can be stopped by briefly pressing the buttons on the watch.
Time Calibration	After the watch is connected to the APP, you can synchronize the watch by tapping the Time Calibration.
Power Saving Mode	You can set power saving mode for the watch by tapping the power saving mode button. In power saving mode, the watch will turn off all reminders, retaining only the functions of timing and steps recording.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
