Solder
Board-Component View
2

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components, including several large silver capacitors and smaller surface-mount components. The board is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.
Solder Board-Component View 4	 A photograph of a black printed circuit board (PCB) featuring four large, yellow, rectangular components, likely LEDs or displays, arranged in a row. The board is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.

Solder Board-Component View 5	 A photograph of a black printed circuit board (PCB) component, labeled 'Solder Board-Component View 5'. The component is rectangular and features a series of gold-colored solder pads along its edges. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The component is oriented horizontally, and the ruler is placed vertically to its left.
Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 6'. The component is rectangular and features various electronic components, including a large black integrated circuit (IC) and several smaller components. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The component is oriented horizontally, and the ruler is placed vertically to its left.

Solder Board-Component View 8	 A photograph showing a yellow printed circuit board (PCB) with various electronic components soldered onto it. The components include a large black integrated circuit (IC), several electrolytic capacitors (one with 'XLD.EE33-105224' printed on it), and other smaller components. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The background is a light blue surface.
Solder Board-Component View 9	 A photograph showing a green printed circuit board (PCB) with various electronic components soldered onto it. The components include a large black integrated circuit (IC), several electrolytic capacitors, and other smaller components. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The background is a light blue surface.

Solder Board-Component View 11	 A photograph of a green printed circuit board (PCB) with various electronic components, including integrated circuits, resistors, and capacitors. The board is positioned next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The board is oriented vertically, and the ruler is placed horizontally to its left.
Solder Board-Component View 12	 A photograph of a black printed circuit board (PCB) with four gold-colored circular components, likely connectors or test points, arranged in a row. The board is positioned next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The board is oriented horizontally, and the ruler is placed vertically to its left.

Solder Board-Component View 13	 A photograph showing a yellow rectangular component with four black curved marks and two red 'I' marks. It is placed on a blue background with a black ruler for scale. The ruler has markings in millimeters (0 to 100) and centimeters (0 to 10).
Antenna View	 A photograph showing a green printed circuit board (PCB) with various electronic components. A red box highlights a specific area on the board, and a red line points to a label 'BT Antenna' in a red box. The label is connected to a green antenna component. The antenna has a black cable attached to it. The PCB also features a large black chip, several capacitors, and other electronic components.
