

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden bench. A red cable connects it to a power line interface unit (PLI) on the floor. The PLI is connected to a power strip on the wall. To the right, a wooden table holds a small electronic device under test.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. A test fixture is mounted on a metal stand in the center of the chamber. The floor is metallic and has yellow and black safety tape markings.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**
