

Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) component, labeled '6', showing its soldered side. The board is rectangular and populated with various electronic components, including a large integrated circuit (IC) in the center, several resistors, and capacitors. It is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A red wire is connected to the right side of the board.
Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) component, labeled '7', showing its soldered side. The board is rectangular and populated with various electronic components, including a large integrated circuit (IC) in the center, several resistors, and capacitors. It is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A red wire is connected to the right side of the board.

Solder Board-Component View 8	 A photograph showing two small electronic components on a blue textured surface. The component on the left is a white rectangular module with a green PCB and several surface components. The component on the right is a smaller green PCB with a central chip. A black ruler with white markings is placed below the components, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom.
Solder Board-Component View 9	 A photograph showing a single small electronic component on a blue textured surface. The component is a green PCB with a central chip. A black ruler with white markings is placed below the component, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom.
