FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device must not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

The transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

Note: The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

The equipment generates, uses, and can radiate radio frequency energy, and if not installed used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

To help prevent interference from your equipment, you should be advised that:

- This device complies with the requirements for intentional, unintentional, and part 15B microwave oven emissions, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reposition or relocate the receiving antenna;
- Increase the separation between the equipment and receiver;
- Move the equipment into a circuit different than that to which the receiver is connected;
- Connect the dealer or an experienced Radio Shack technician for help.

This device complies with FCC laboratory exposure limits for safe use as uncontrolled environment. This device should be installed and operated with minimum distance from the radiator to your body.
