* "-" direction means to shorten blade tip.

Instructions

1. Power on
①Connect the power supply with the adaptor and insert to the socket. Use 100-240V AC power supply to make the device operate normally.
②Insert the other end of the adaptor port into the power interface.
③Press the power button to power on the cutter.

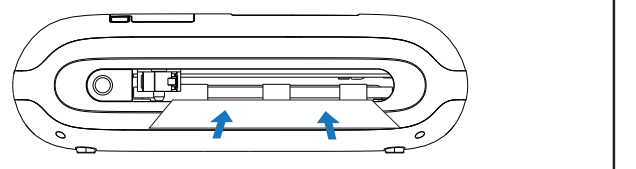

2. Install the blade holder & blade

- ①Open the storage box
- ②Pull the paddle of holder clamp, adjust the length of the blade tip, and put the blade holder inside (Gear 5 for the blade holder is recommended).
- ③Push back the paddle and fix the blade holder.

- ④Cover the storage box.

3. Place materials

- ①Prepare a sheet film to be cut, confirm that the protective film is flat and the film layer is complete without bending, folding or missing layers
- ②Place the sheet film to the area shown.
- ③The machine will automatically pick up the film paper.

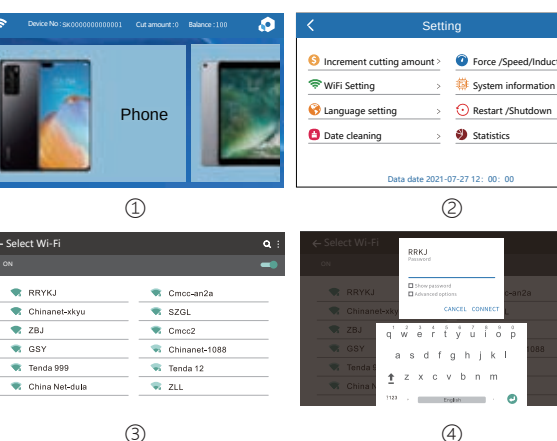

Refer to the dotted line for the placement of the diaphragm
Do not put your hands in the cutting area in case of harm

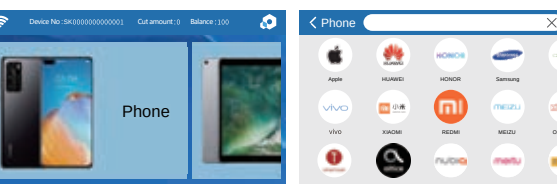

4. WiFi Setting

Click [⚙️ Setting] on the homepage, enter the setting interface, click [WiFi Settings], connect to WiFi, enter the password, and wait for the machine to successfully connect to the WiFi network.

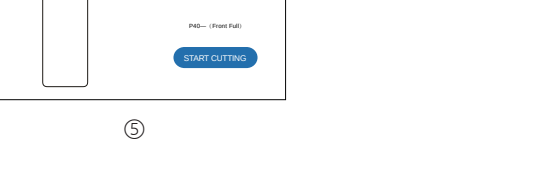

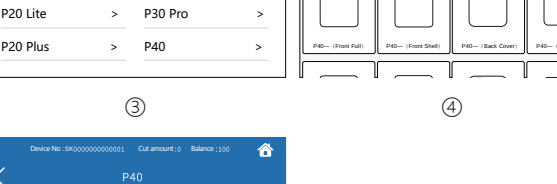

5. Start cutting

Select the brand and model of the device to be cut on the homepage and click [Start Cutting] to start cutting.

6. Complete cutting

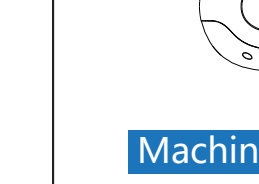

The protective film will be pushed out when the cutting finished.
