➤ 1 Product Overview

Thank you for purchasing the device!

This user manual is designed to help you quickly set up and operate your device and functions of its companion app. Follow the instructions below to maximize your experience with the device.

➤ 2 Download the Dollarfix App

- Option 1: Scan the QR code as shown in the picture above.
 - Option 2: Search for "Dollarfix" in the App Store or Google Play.
- The app is available for free download.

Dollarfix is an application platform that integrates the community and vehicle diagnostics. It aims to create an interactive and communicative space. At the same time, through co-branding, Dollarfix integrates devices from different brands, such as THINKCAR, MUCAR, DND, ANCEL, KINGBOLEN, etc. There is no need to switch between different applications, and it become as a new bridge connecting car owners.

➤ 3 Bind and Activate Device

Enter the Device Serial Number (or scan the QR code) and activation code from the Quick Start Guide, and then tap Activate to complete the process.

1. Click the "👤 Me" sign in the upper right corner of the homepage.

2. Click the "📁 My Device" button.

3. Click the "Activate Device" button.

Activate Device

4. Scan the QR code in the English quick entry manual, or manually enter the activation code and serial number to complete the binding.

➤ 4 Download the Diagnostics Software

In the "Diagnostics" section of the app, you will need to download the corresponding diagnostic software when performing the "Enhanced Diagnostics" or "OBD Functions" for the first time. Once downloaded, the software will not need to be downloaded again for future use.

➤ 5 Insert the device into the vehicle's OBD-II port

The OBD-II port is typically located under the dashboard, above the pedals on the driver's side. Below are the five most common locations for the OBD-II port (as shown in the figure to the right). Insert the device into the port, and a green light will illuminate, indicating that the device is powered on.

➤ 6 Turn the ignition to the "ON" position

➤ 7 Establish a Bluetooth Connection

Open the Dollarfix App, and it will automatically search for activated devices. Select your device and connect to it via Bluetooth within the app.

Note: Do not pair the device directly through your phone's Bluetooth settings. Ensure that the device is paired within the app by following the provided instructions.

➤ 8 Device Ready for Use

After the Bluetooth connection is successfully established, you can access all the functions of your device. Explore additional features within the app for a more comprehensive experience.

➤ 9 FAQ

Q: What do the different lights on the device indicate?

A: There are three different lights on the device:

Green light is always on: the device is powered on, but not connected to the APP.

Blue light is always on: the device has successfully connected to the APP.

Blue light flashes: the device is working.

Red light is always on: when the device is updating the firmware or the update fails.

Light off: the device is in sleep mode.

Q: Why do I need to download the diagnostics software after downloading the app?

A: Due to the wide variety of vehicle manufacturers, each requires specific diagnostics software. The device will first recognize the vehicle manufacturer during the diagnostic process and then download the corresponding software to ensure compatibility.

Q: Does the device need a firmware upgrade?

A: Yes. When the device connects to your smartphone via Bluetooth, it will automatically check if the firmware is up to date. If not, the firmware will be updated automatically.

Important: Do not disconnect the device during the firmware upgrade process, as it may cause damage requiring repair.

Q: Can the same app account bind to multiple devices?

A: Yes, you can bind multiple devices to the same account through the app.

Q: What should I do if I experience a Bluetooth connection issue with the Dollarfix app?

A: 1. Ensure the connector is powered on. If not, try connecting to another vehicle.

2. Verify that the SN (serial number) printed on the connector matches the one displayed in the Bluetooth list. If you have multiple devices, ensure you select the correct one from "My Devices".

3. Follow these steps based on your device:

For Android: Unpair the device from the Bluetooth list, then pair it again and switch to the app to connect.

For iOS: Connect directly within the app without pairing the SN in the phone's Bluetooth settings.

➤ 10 Customer Service

If you have any questions, please contact us in the following ways:

1. Download the Dollarfix app from the App Store, register and log in, and click "customer service" in the Message module of the app.
2. Scan the QR code below through the browser.

(If you don't know how to scan the QR code, please use the third method to contact customer service.)

3. Enter the URL during browsing: <https://cst.dollarfix.com>

➤ 11 Warranty Card

Life-time technical support and 12 months warranty (including electronic products for damages caused by defects in materials or workmanship) are provided as a standard service. Damages to the device or components caused by abuse, unauthorized modifications, Usage beyond the intended purposes, operation in a manner not specified in the instructions, etc. are not covered by this warranty. Compensation for dashboard damage caused by defects in this device is limited to repair or replacement. Does not bear any indirect and incidental losses.

SIMPLIFIED EU DECLARATION OF CONFORMITY

Hereby, THINKCAR TECH CO., LTD. declares that this equipment is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address:

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

ISED Warning

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil contient des émetteurs/récepteurs exemptés de licence qui sont conformes aux flux RSS exemptés de licence d'innovation, sciences et développement économique Canada. Le fonctionnement est soumis aux deux conditions suivantes:

1. Cet appareil ne peut pas causer d'interférences.
2. Ce dispositif doit accepter toute interférence, y compris celle qui peut provoquer un fonctionnement indésirable du dispositif.
