How to create/dismiss device groups?

Please you do so:

- Tap a device in the device list to enter the device's control panel.
- Tap the button in the upper right corner to enter the device editing page.
- Tap Create Group. On the Select Device page, all devices that have been added to the account and have the same model as the device are displayed.
- On the device group page, click the button in the upper right corner to enter the settings page, and click the "Dismiss Group" button at the bottom of the page to dismiss this device group.
- If you want to manage different types of devices or devices that don't support groups, you can add these devices to one "Tap-To-Run/Automation" to meet your needs.
- If the group creation fails, please click to view the solution.

Unable to create a device group?

Please check in the following ways:

- Please click on the upper right corner of the device to enter the interface, and check if you can see the "Create Group" function.
- If you can see it, click on it and create a group.
- If you do not see "Create Group" on device setting page, it means that the device does not support group settings (Not all types of equipment support group functions).

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
