Approval Date:
31.03.2021

Application to Class II Permissive Change

We, ART S.p.A., hereby declare that the intention of this class II permissive change is to add a host: NIT (model: NIT; Brand: ART) to the certified module which was originally granted on 13.02.2020 under FCC ID: 2AUGZNIT.

In this application the NFC function will be disabled, this was possible by using the specific compiled onboard firmware that haven't implemented the commands necessary to use the disabled feature of the module. The final user doesn't have any access to the firmware and cannot change the module capability in any case. The hardware and software of the module are exactly the same as in the originally grant, no modification applied.

The antenna information is listed below:

- Max gain: -1,5dBi
- Max allowed input power: 13dBm

The module mentioned above has been approved and is electronically and mechanically identical to the original instructions and requirements. Therefore, we, ART S.p.A., take the responsibility to ensure each module complied with all requirements after integration in the host.

Thank you for your attention in this matter.

Yours Sincerely,

F. Ortix
